

# Hedgerow

*The work you do is important.  
So is the data you manage.*

## Hedgehog Application Suite

*A comprehensive environmental health data management solution.*

### Hedgehog

The comprehensive data management engine designed to manage all agency programs and processes in a single database. The user interface is flexible, full-featured and modeled after industry-standard software. Environmental Health agencies across North America rely on Hedgehog every day to gather and provide accurate data when they need it.

### Hedgehog Disclosure Site

The disclosure website that allows members of the public to search for, and view, the latest facility inspection details. The Disclosure Site integrates with Hedgehog, and can be configured to disclose any facility inspection type. Constituents no longer need to use your front office staff to access public right-to-know information. The Disclosure Site can also be utilized by the public to submit online complaints.

### Hedgehog Portal

The web-based data sharing framework that allows your agency to offer online services to regulated businesses. With the Hedgehog Portal, regulated facilities can pay fees online, process permit renewals online, submit online applications for review and approval, and much more. The Hedgehog Portal brings e-government full circle, and integrates seamlessly with the Hedgehog database.

#### ✓ INCREASE FIELD PRODUCTIVITY

Outfit field staff with Tablet PCs equipped with real-time data, electronic inspection forms, and automated inspection scheduling.

#### ✓ IMPROVE SERVICE DELIVERY

Provide online services such as permit renewals, application submissions, and fee payments to regulated businesses.

#### ✓ USE ACCURATE DATA

Retrieve real-time data for analytical reporting via ad-hoc queries and powerful reporting tools.

#### ✓ CHOOSE FLEXIBILITY

Adopt a solution that grows with your agency and eliminates costly custom programming with superior configuration tools.

## e-Government

Manage all programs and regulatory processes in a single, consolidated database with a data-driven framework that supports e-government and encourages standardization and consistency.

Perform scheduled inspections, or follow up on outstanding violations or complaint investigations from a personalized dashboard.

Take advantage of multi-functional grids that offer powerful, on-demand filtering, grouping, and sorting for ad-hoc reporting and data analysis.

Provide online services to regulated business and members of the public.

## Technology

The Hedgehog Application Suite delivers reliable, cutting-edge technologies.

Hedgehog is an n-tier 'Smart Client' application built on the Microsoft .NET Framework. 'Smart Client' applications are flexible, feature-rich and far exceed the capabilities provided by strictly browser-based applications.

- ✓ Microsoft .NET Framework
- ✓ Microsoft SQL Server Database
- ✓ Microsoft Azure Cloud Services
- ✓ Active Directory Integration
- ✓ Offline Capability
- ✓ Role-Based Security
- ✓ Google Maps™ Geocoding
- ✓ Tablet-enabled Interface
