

### Research Options and Participation Steve Pollock W-G3 February 28, 2024

# What Standards should your office collect?

- UL 142 and 142A
- UL 2085
- PEI RP200
- Manufacturer's Standards (that are not proprietary)
- Installation Instructions
- The API suite of 653 and 570

### Access to other UL Standards

• Free but requires patience shopulstandards.com

### **How to Access Standards Content**

Standards can be viewed online for free via the Digital View feature on our UL Standards & Publications Site. Simply create a free account to get started. ISO and IEC adoptions are not available for digital view due to their copyright.

Members of our Technical Committees get access to the standards associated with their committees via the Committee Library in our Collaborative Standards Development System (CSDS).

Remember Performance Testing

### UL 142 PERFORMANCE TEST METHODS

42 Tank Leakage Test

42.1 Caution

42.1.1 Caution – Testing with air pressure presents a risk of injury to persons and personnel should be

instructed in precautions to be taken during such testing. The precautions should include the use of a

pressure-relief device that will reduce the risk of the tank becoming pressurized in excess of the specified

test pressure.

- Fabricators can test tank designs (and supports, lift lugs, etc) that allow for alterations to the "cookbook" tables.
- In some instances, fabricators can also use engineering analysis for UL to review and approve.
- For a marketing advantage, designs are often tested to worst case scenario to ensure a safe product as well as safe shop operations.
- Along with being listed to build to the cookbook, manufacturers are also bound to fabrication in accordance with their MH FILE.
- This file is confidential and cannot be shared.
- The file also contains unique inspection criteria FUS

#### **B. Product Information**

CALIFORNIA

Manufacturer's name	Onken LLC
Type of product: (portable lamp, toaster, etc.)	Portable Transfer Tank for Oil Svc
Product model number	DW New Oil, Used Oil Tanks
UL File Number (if known)	MH49343
Where did you purchase this product?	
Product description	Double Walled Storage Tank on caster for Automotive New Oil and Used Oil

# **UL Research Options: Market Surveillance**

#### C. Description of Concern

Concern description (If reporting an online advertising concern, please provide a link.)

It appears that <u>Onken</u> LLC tanks are listed under Outline of Investigation UL 75, Portable Containers and Tanks for Flammable and/or Combustible Liquids, Edition 1, issued 18DEC2014, Category EFTZ. However, the label applied to the tank is making use of UL 142/ULC S601 for Stationary Tanks. UL 142/ULC S 601 tanks are not qualified to be portable.

#### **Upload Pictures**

You can upload up to four (4) images of the product in question. **Please include a photo of the UL Label.** NOTE: At this time, we can accept image formats only, such as JPG, GIF, PNG or BMP. After submitting this form, if you would like to provide additional images, or files in an alternate format, please email us at Market.Surveillance@ul.com.

# Gather info from STI/SPFA on a tank

- Tank Information often relies on the owner or the installer returning the Warranty Confirmation card.
- If you can see and collect the STI/SPFA serial number, that can be helpful.
- If you can see and collect an STI/SPFA number and a UL or SwRI number, that helps even more.
- Contact info@stispfa.org
