PARKING MAP INCLUDING EVACUATION ASSEMBLY AREA

EMERGENCIES

Emergencies will be indicated by a loud horn and visual fire annunciators located throughout the facility, giving audible and visual notice to evacuate. Attendees should immediately evacuate when alarm sounds or when notified by EMD staff. Use the exit doors in each conference room and exit the building assembling at the car cage in the South end of the parking lot. Evacuation maps are in each conference room and throughout the building.

EMD staff will check the bathrooms during an evacuation event, but you should ensure that all attendees exit quickly.

Meeting organizers will use their check-in sheets to verify attendees have evacuated and are safely in the assembly area. Immediate notice will be made to EMD safety personnel (identifiable by colored vests) if all are not accounted for.

If an emergency begins in a meeting, staff are available at the Public Counter in the main lobby to assist with summoning emergency responders and notification to EMD Management/Safety staff.
